

WHAT MAKES AMERICAN CRYSTAL IS WHO MAKES AMERICAN CRYSTAL

American Crystal Sugar Company is committed to becoming the most innovative sugar producer in the world. We do this by providing capable people with distinct paths for advancement.

For our factory employees, we've developed a Boiler Tech (BT) Career Track. This well-defined training program can propel employees from a general labor BT6 position up to a BT1 position overseeing a large portion of factory operations. For each level achieved, employees expand their sugar processing skill set through classroom learning, test outs, and on-the-job experiences. In addition, advancements are rewarded with higher pay, more responsibility, and a greater opportunity to impact factory performance.

Every day, American Crystal's people are working harder, thinking smarter, and putting ideas to work that move our business forward. It's the way we've always done it and it's the way we always will.

Keep reading for more information about how to advance your career through our Boiler Technician program.

We're helping go-getters go further.

WE ARE INNOVATORS, LEADERS, COWORKERS, AND TEAMMATES

Sugar manufacturing is a dynamic and exciting business to be part of. To keep our competitive edge, American Crystal embraces change and rewards responsible, action-oriented employees.

Even though we work in a fast-paced, quality-driven environment – one that keeps employees challenged and growing from day one – no priority is higher than the safety of our workforce. At American Crystal, we're a team committed to treating everyone with dignity and fairness. We respect each other's roles and support each other's growth. Our values include mutual respect, open two-way communication, and trust. Our people are passionate about what they do and engaged in making us the leading sugar company in the world.
